Performance of PIT TEST according to EN 12566-1:2000/A1:2004 on a prefabricated septic tank designated 3500 l

An officer from SP supervised at Cipax Eesti AS, factory in Taebala the performance of a PIT TEST on a rotation moulded septic tank made from polyethylene. The design of the septic tank is shown in appendix 1. The septic tank was made from a polyethylene resin designated "Matrix REVOLVE BH3539" and the weight was 165 kg.

The tank was mounted with a support plate and a steel frame inside.

The test was performed according to EN 12566-1:2000/A1:2004 Annex D.6, Pit test, wet conditions, with 1 meter backfill.

Conclusion

The result fulfils for tested characteristic the requirement in EN 12566-1:2000/A1:2004, Annex D.6.

Yours sincerely,
