

- |   |                           |
|---|---------------------------|
| 1. Inlet                                  | 10. Dewatering device     |
| 2. Screen with mash <4mm                  | 11. Drain water           |
| 3. Pre-treatment, buffer tank             | 12. Dried matter (waste)  |
| 4. Eccentric pump (feed pump)             | 13. Outlet flotation unit |
| 5. Flotation unit                         | 14. House or shelter      |
| 6. Dosing station for ph-equalizing       | 15. Mixing device         |
| 7. Dosing station for polymer             | 16. Control cabinet       |
| 8. Dosing station for precipitation stuff |                           |
| 9. pH-regulation                          |                           |
